Signage Innovations™

Stylish Solutions, Friendly to the Environment

Terra unites image and style to meet the needs of sustainable building environments. Terra is made from ecoresin™, a 40% post-industrial recycled content, non-off-gassing material. Terra's nearly endless patterns and color options combine to provide aesthetic appeal for green buildings, while meeting ADA guidelines and building codes.

- Class A or B flammability and smoke spread rating. Class A achieved with usage in facilities with fire suppression system
- ADA-Ready™ tactile letters and Braille integral to uniquely patterned surface
- Standard patterns and non-standard patterns of recycled materials available
- 0.0625", 0.125", 0.25", and 0.375" thicknesses available on select standard and non-standard materials

Sustainable Innovations

Terra is a durable, sustainable signage solution, created from 40% post-industrial recycled material. Incorporating decorative stand-offs and mechanical fasteners adds to the sustainability of the signage by allowing updates to the message panels, as necessary, without replacing entire signs.

Standard and Non-Standard Material Options

- 15 standard materials available for "quick ship" purposes
- Standard materials available in thickness of 0.0625", 0.125", 0.25", and 0.375"
- Standard materials can be layered together with transparent VHB tape
- Endless non-standard material options through layering and graphic applications
- Non-standard material lead time 3 - 4 weeks
- Non-standard materials can have translucent or opaque backing

Environmentally Friendly Material and Processing

- 40% post-industrial recycled material bonded to a 0.03" clear, high-resolution polyester photopolymer
- Material production process uses plain tap water and its effluent is 100% biodegradable which can be disposed of in any public waste disposal system
- GREENGUARD Indoor Air Quality Certified™ and Scientific Certification Systems (SCS) certified for recycled content
- Class A or B flammability and smoke spread rating

Tactile Lettering Color Options and Edge Finish Options

- 18 standard paint colors available; custom colors available
- Standard Colors:
  White, Brushed Gold, Black, Green, Dark Cream, Light Gray, Dark Green, Light Beige, Medium Gray, Medium Blue, Dark Gray, Dark Blue, Brushed Silver, Burgundy, Deep Navy, Yellow, Red, Dark Brown
- Unframed signs can receive a beveled edge, bull nose edge, or roman ogee edge finish
- Edge finishes require a 0.25" or 0.375" material thickness
- One year warranty
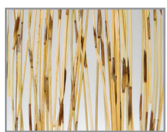

Mounting and Fastener Options

- Transparent VHB tape mounting is standard
- Decorative mechanical fasteners and stand-offs optional
- Signage can be framed with options ranging from inset plastic trays, aluminum, brass or wood framing materials
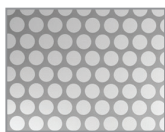

Material Thicknesses Standard

- 0.0625": Pure Copper, Pure Red, Black, Eiderdown, Melody
- 0.125", 0.25" and 0.375": Mega Cirque Silver, Bloom Tangerine, Fossil Leaf, Ion Green Tea, Linea Ivory, Banana Fiber Light, Mari Seamless, Pure Copper, Pure Red, Black, Eiderdown, Melody
- 0.375":Tiger Thatch, Bear Grass, Bear Grass Lite
