

Complete Custom Exterior Capabilities

ASI works closely with each client to create a custom exterior solution that meets their identification and wayfinding needs, complements the architectural style of the facility as well as the surroundings, and remains aesthetically appealing over time. Also, a variety of illumination options are available.

Typical materials for durable custom exterior applications include:

- Aluminum
- Polished or brushed aluminum
- Stainless steel
- Fiberglass
- Stone
- Etched marble
- Simulated materials

Creating Unique Solutions
