

Old-World Expertise Creates Stylish Etched Metal Solutions

SignEtch™ II is our traditional etched plaque signage solution which is created from aluminum, brass, bronze, or stainless steel materials. SignEtch II blends intricately etched graphics and unique designs to create a distinguished signage solution. Because it uses non-corrosive materials or is finished with a urethane topcoat with UV inhibitors and antioxidants, SignEtch II is rated for interior and exterior applications such as commemorative plaques and building identification.

- Interior and exterior use
- Material: brass, bronze, stainless, aluminum
- Intricate etched graphics
- Thickness range: 0.064" to 0.375"
- UV-resistant topcoat
