

Meet the Exterior Needs of Any Facility

Messenger Exterior™ modular signage system brings a fresh appearance to exterior signage. Combining form, flexibility and function, Messenger Exterior features interchangeable, slim-line panels that can be configured to meet your specific needs. Messenger Exterior can be combined with Messenger Interior™ to create a complete design solution for both the exterior and interior of a facility.

- Durable aluminum construction
- Front loading interchangeable aluminum panels
- Mounting: wall, monolith, center post
- Installation: mechanical ground sleeve, flange mount
- Wide range of custom and standard colors available
- Graphics: LTV series vinyl graphics or direct UV cured digitally printed graphics
- ISO 9001 manufacturing process
- Two year warranty on parts and labor

The Messenger Exterior™ signage system is a durable, modular solution, which ensures that the system can be easily updated or repaired. The components can also be easily disassembled and sorted into appropriate recycling processes at end-of-life.

Modular Signage Solutions
