# Dynamic content management, integrated digital display system

Do you want to promote your company and impress your visitors and staff? Slimline easily and effectively manages digital signage in order to improve your organizations efficiency and image.

Slimline keeps your visitors and staff informed with instant messages and up-to-date information throughout the day. Entertain and reach your customers with streaming videos or company presentations and keep them updated with the latest news directly from the internet.

### A Day In the Life

The receptionist scheduled the conference room; the staff was ready for our most important client's visit. 9:00 am; the digital display in our entranceway and at the conference room are updated instantly with the names, titles and company logo of our guests. The moment they walked in the door, our customers knew we cared, we were prepared and they knew exactly where to go. Slimline led them, every step of the way…

A single resource schedules and updates information using existing scheduling software, networks and directional displays, digital room identification and information displays are updated throughout the facility.

# Digital Signage Solutions
